

## ***Tilade* Discontinuation**

King Pharmaceuticals has discontinued the manufacture of *Tilade* (nedocromil sodium inhalation aerosol) inhaler, indicated for the maintenance management of mild to moderate asthma in patients 6 years of age and older. The discontinuation is based upon a number of factors, including the inability to identify a qualified chlorofluorocarbon propellant inhaler manufacturer. *Tilade* will remain available through pharmacies and wholesalers until current supplies are depleted. For more information about the *Tilade* discontinuation, contact King's Professional Information Services department at 1-800-776-3637.

**Attention All 4D Clients:**

4D has queried the claims data base and has determined no claims for Tilade® have been dispensed in the past 90-days. If you have any questions please contact your 4D Account Manager.
